

```
import java.util.TimerTask;  
  
public class TableOf7Task extends TimerTask{  
  
    public TableOf7Task() {  
        // TODO Auto-generated constructor stub  
    }  
  
    public void run () {  
        System.out.println ("The Table of Multiplication of 7 is: ");  
        for (int i=1; i<11; i++) {  
  
            System.out.println("7 x "+ i + " = "+ 7*i);  
        }  
    }  
}
```
